DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: Claims 98-109 are allowed

Claim 98: Prior art of record does not teach combining the most significant portion, without encryption, and the encrypted version of the least significant portion to form a storable private key sequence, the storable private key sequence being such that a decryption of the storable private key sequence using a proposed secret other than the secret known to the user results in a decrypted pseudo-key, wherein a pseudo-key is a key that conforms to the predetermined key format but does not match the private key and wherein the number of proposed secrets that lead to a pseudo-key is larger than a security threshold.

Claims 99-103 are allowed because of dependency.

Claim 104: Prior art of record does not teach combining the first portion, without encryption, and the encrypted second portion to form a storable private key sequence, the storable private key sequence being such that a decryption of the storable private key sequence using at least some proposed secrets other than the secret known to the user results in a decrypted pseudo-key, wherein the number of proposed secrets that lead to a pseudo-key is larger than a security threshold.

Claims 105-109 are allowed because of dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
